(54) Title: CABLE CONNECTOR ASSEMBLY AND SYSTEM

(57) **Abstract:** The invention relates to a cable connector assembly comprising cover means and connecting means, wherein the cover means comprise wall portions and an opening adapted to accommodate the connecting means. At least one of the wall portions is at least partially curved for guiding at least one cable of one or more other cable connector assemblies. Cable ties to attach the cable to the curved wall portion are disclosed as well. The invention facilitates cable management in dense and small cabinets.
